

M. BOHLKE VENEER CORP.

Taking Quality Veneer One Step Further

In 1998, M. Bohlke Veneer Corp. added its Face division under the direction of Marc Bohlke. Driven by customer demand and to complement the company's other products, this state-of-the-art manufacturing facility produces dimensioned faces for the furniture, door and panel industries.

With four veneer splicers, we have the capabilities to produce a variety of sizes and dimensions from a standard face to the most intricate car interior. Whether it's a natural wood species like Maple or Cherry or a unique species like Olive Ash burl, our Face plant makes the options for furniture, door and panel customization limitless. We also offer custom splicing from veneer purchased from our inventory and both book and slip match for running, balance and center matching. Custom grades and FSC® certified faces are available upon request as well.

Vtec is an innovative and cost-effective approach to wood veneer. Vtec is real wood, engineered through a patented process that allows us to reproduce nature's rich and beautiful grain patterns with uniformity and consistency, yet on a large scale with very high yields. The result is large inventories of veneer available with consistent color, grain structure and pattern that's not available directly from nature. With our Vtec veneer, you can create matching surfaces in large quantities. This means you can return to us years from now and purchase Vtec veneer that matches your original purchase. Vtec is manufactured and certified in accordance with ISO 14001 and is available as FSC® certified.

Another product in our Face division, Bamboo, is a sustainable and rapid growing plant and one of the oldest building materials. The distinct look of bamboo has aroused increased popularity of this appealing plant. You'll find furniture, kitchens, store fixtures, flooring, walls and ceiling panels beautifully adorned with Bamboo's striking qualities. We offer Bamboo veneer in three colors: natural, caramel and khaki. All colors are available in narrow or wide stripe grain. All of our bamboo material is no-added urea formaldehyde (NAUF) with the option of FSC 100%.

To learn more about MBVC's spliced veneer faces, Vtec, or Bamboo, or to receive samples, please call 513-682-1460, or e-mail sales@mbveneer.com.
