Lumber

We're Obsessive About Superior Lumber

If you're looking for the finest exotic and imported lumber matched with quantity and selection, look no further.

For nearly half a century, M. Bohlke Veneer Corp has followed Manfred Bohlke's obsession for acquiring the highest quality lumber the world has to offer. Originally, our exotic selections were offered to complement the purchases from our exotic veneer customers.

Yet it was only a matter of time before a broader array of customers wanted access to our exquisite lumber to create matching visual harmony with their projects. In response, we established a distinct lumber business where you can get the select pieces of prime lumber you need. And although we operate our lumber division as a 'boutique', it's backed by our core veneer business and its warehouse that sprawls over 100,000 square feet.

All of our exotic species have inherent characteristics and are exceptional in their beauty. We carry square edge lumber and boules. We also offer a full line of pre-finished table top slabs in an unlimited pallet of colors, ready to complement the most intricate architectural projects.

Our relentless pursuit for quality lumber is part of what makes M. Bohlke Veneer Corp. the obvious choice for architectural millwork, yacht applications, musical industries, custom furniture applications, and more.

When you select your lumber at M. Bohlke Veneer Corp, prepare to be amazed. You can rest assured that you have the world's most remarkable lumber at your fingertips.

To learn more about MBVC lumber or to receive samples, please call 513-682-1460, or e-mail sales@mbveneer.com.

Lumber Species List

WE SPECIALIZE IN FINE QUALITY LUMBER TO COMPLIMENT OUR IMPORTED VENEER INVENTORY. MUCH OF OUR LUMBER IS CUT FROM VENEER QUALITY LOGS TO ACHIEVE SUPERIOR LUMBER GRADE FOR ARCHITECTURAL MILLWORK REQUIREMENTS. IF YOU DO NOT SEE A SPECIES LISTED YOU ARE LOOK FOR, PLEASE INQUIRE, AS WE GENERALLY HAVE VENEER LOGS TO CUT INTO LUMBER THAT CAN BE KILN DRIED ON SHORT ORDER.
