Lumber

We're obsessive about superior lumber.

If you're looking for the finest quality and best selection of imported lumber, you have found it. Manfred Bohlke's obsession for superior lumber has led to our impressive inventory of square edge lumber, boules and slabs. All of our imported species have natural features and are extraordinary in beauty.

At first, we only offered lumber to compliment purchases from our veneer customers, but before long, more people wanted access to our lumber to create visually stunning projects. In response, we created a unique lumber business that operates like a boutique, giving you the ability to select pieces of the prime lumber you need. Our lumber is backed by our veneer business and warehouse that is over 175,000 square feet. Our manufacturing capabilities include a 5,000 board foot capacity vacuum pressure kiln, a 6' x 18' routing head leveler, and a Woodmizer WM1000 67" bandsaw.

Our pursuit of high quality lumber makes us your clear choice for architectural millwork, aircraft design, yacht design, musical instrument industries, furniture design and more. When you shop with us, rest assured knowing the world's most remarkable lumber is at your fingertips.

Square Edge • Boules • Live Edge Slabs • Bases

Lumber Species

We specialize in fine quality lumber to compliment our imported veneer inventory. Much of our lumber is cut from veneer quality logs to achieve superior lumber grade for architectural millwork requirements. If you do not see a species listed that you are looking for, please inquire, as we generally have veneer logs to cut into lumber that can be kiln dried on short order.

Afrormosia	Douglas Fir	Magnolia	Palm Tree
