

A large, high-resolution image of Bubinga Pommele wood grain, showing a complex, interlocking pattern of reddish-brown and pinkish tones. The grain is characterized by its wavy, cellular structure, which is typical of the Pommele figure.

Bubinga Pommele (*Guibourtia tessmannii*)

Region: Africa **Figure Type:** Pommele **Cut(s):** Lathe - Peeled

Ranges from pink to vivid red, to reddish brown, with lighter red to purple veining. Straight grained or interlocked with a fine to medium texture. Common applications: Architectural panels, millwork, fine furniture and cabinetry, yacht and aircraft interiors.
