

A large, high-resolution image of a cherry wood grain with a crotch pattern. The wood is light pinkish-brown with a fine, straight, close grain. The crotch pattern is characterized by a central vertical line where the grain lines curve outwards and then back inwards, creating a symmetrical, V-shaped or 'crotch' appearance. The overall texture is smooth and satiny.

## Cherry Crotch (Prunus serotina)

**Region:** North America    **Figure Type:** Crotch    **Cut(s):** Flat

Light pink brown to dark red brown color with fine, straight, close grain. Has a satiny finish and fine texture. Common applications: Architectural and acoustic panels, millwork, high-end cabinetry and furniture.
