BM. BOHLKE LUMBER Stunning walnut burl cookies

We are excited to share our most recent addition of, dare we say, absolutely "sweet" California walnut burl cookies. Our lumber team individually grades each and every slab, assigning inventory numbers, completing measurements, taking multiple photos, and detailing noteworthy characteristics. There are some pieces with ingrown sap, and there is very little checking on most of the selection; these cookie slabs are truly astounding beauties that are graded and surfaced one side, ready for your next project.

Interesting fact: our founder and president, Manfred Bohlke, is considered to be one of the pioneers of the walnut burl industry. Starting in the 80's, MBVC began harvesting burls from large walnut orchards in California for burl veneer. Walnut burls grow in such a way that they can be harvested from the same tree several times over. While burls may be considered abnormal growths on trees, they certainly translate into phenomenal pieces for woodworking artisans.

Pictured are the available cookie shaped slabs contact your MB sales representative, or our team at <u>sales@mbveneer.com</u>, to reserve your top choice today.

Santos rosewood cookies, boules, and more

Our team also recently added Santos rosewood cookies and 4/4 boules to our existing Santos inventory of 6/4, 8/4, 10/4 FAS&BTR square edge and live edge slabs. This beautiful species is incredibly versatile and is utilized in architectural millwork, fine furniture making, and the musical instrument industry. Our fresh slab arrivals are perfect candidates for showstopper tables or one-of-a-kind wall art in a variety of settings; the available

boules are ideal for projects calling for consistent color and grain structure.

Santos wood has a very fine grain, takes a high polish and showcases its natural beauty through a wide range of colors that may include light to dark chocolate browns, violets, occasional oranges, and reds, accompanied by handsome black striping.

8/4 Spessart Oak boules
