

Khaya Mahogany crotch: in a class by itself

Khaya Mahogany crotch is known for its expansive figure. These massive trees average upwards of 200 feet tall.

Pictured right is a 13' dining table fabricated for the restaurant industry from a live edge slab sourced from M. Bohlke Lumber, and below is Mahogany crotch veneer on a curved ceiling panel in our own corporate dining room; both projects were created from Khaya Mahogany crotch. Although these projects are unrelated, showing them together is a testament to why we entered the imported solid wood business: to provide veneer quality lumber, slabs, and boules to complement our world class veneer.

Fabricated by

Our available slabs range on average of 13.5' plus with widths between 40" - 60". These sizes would be spectacular for bespoke dining tables to executive conference tables. In addition to slabs, we also have 4/4, 6/4, 8/4 FAS&BTR and 8/4 boule form of Khaya Mahogany available.

To reserve materials, contact your MB sales representative directly, or reach out to our team at sales@mbveneer.com to start the conversation.

Sustainably using one of Earth's most beautiful resources to enrich the world around us.
