European ash availability

Within our European ash catalog, there are nearly 100 individual live edge slabs (some of which are wonderfully wild burl slabs — an excellent choice for river tables), as well as 4/4, 8/4, 10/4 boules with notable figure. Our very own ash conference room features solid ash usage on one of the main centerpieces: the conference table (pictured above.)

[**Did you know?**] During WWI, European Ash was used to construct aircraft; this wood was ideal for the structure of aircraft because of its flexibility and strength. As a whole, the ash family is known for its strength and straight, classically beautiful grain.

To reserve available material, or to learn more about our inventory of ash, contact our team at sales@mbvener.com or your MB Sales representative today.

9'x5' ping pong table net made of Japanese Sen

MBVC Corporate office featuring Sen columns and Tamo ash veneer paneling

Light and airy toned Sen

Sen, also sometimes called Japanese ash, is an attractive wood that is exceptionally popular for furniture and interiors in Japan. This species is a main highlight as a net and inlay on a custom Wenge ping pong table (above). In terms of aesthetics, Sen closely resembles American ash and elm.

Sen is an outlier from other wood species for a very special reason: it does not change color when exposed to natural light. Unlike other species that are used in architectural design, Sen retains its light and airy tones. In fact, this gorgeous wood was specifically chosen for our MBVC Corporate Office (pictured above right) for this reason. Our current Sen inventory includes 4/4 and 8/4 FAS&BTR square edge, an impressive inventory of veneer, and a nice stock of backing boards.

Attractive fumed wood species inventory

Our fumed species have undergone a process that causes tannins of the wood to instinctively darken. The end result is naturally enhanced, warmer toned woods—created without altering grain structure in any way. Available fumed lumber inventory:
