

MB IT MANAGER

Position Overview

This position will be responsible for managing a small team of IT professionals, including a help desk representative and a programmer, implementing and maintaining IT policies and procedures, and ensuring the security and efficiency of our IT infrastructure. This role is crucial for maintaining the technological backbone of our organization and supporting our business objectives.

Key Responsibilities

1. IT Operations Management:

- Oversee daily IT operations to ensure the availability and reliability of systems and networks.
- Monitor system performance and provide necessary maintenance and updates.
- Manage and mentor the IT support team to provide timely and effective technical support.
- Oversee the help desk operations to ensure prompt and effective resolution of user issues.
- Maintain and ensure proper operations of backup systems such as Veeam with onsite and offsite backups.

2. Network and Infrastructure Management:

- Design, implement, and maintain the company's IT infrastructure, including servers, networks, and telecommunications.
- Manage Virtual Servers, Domain Controllers, SAN Disk Arrays, and Backup Infrastructure.
- Ensure network security and data protection measures are in place and up to date.
- Conduct regular system audits and backups to ensure data integrity and disaster recovery readiness.
- Manage physical internal infrastructure, including security cameras & alarm system, phone systems, hardware, switches, desktops, and server environments.
- Configure/manage SonicWall firewalls, Switches, VLANs, and other network components.

3. Software and Hardware Management:

- Oversee installation, configuration, and maintenance of software and hardware components.
- Manage software licensing and ensure compliance with legal and regulatory requirements.
- Evaluate and recommend new technologies and software solutions to enhance business operations.
- Utilize coding skills in Visual Studio with C#, Visual Basic, and ASP.net development for software programming and customization.

4. Cybersecurity:

- Maintain/improve IT security policies and procedures to safeguard company data and systems.
- Conduct regular security assessments and vulnerability testing to ensure firewall and user security knowledge is top-notch.
- Respond to security breaches and incidents, conducting thorough investigations and implementing corrective actions.
- Support and manage CrowdStrike AV/EDR for endpoint protection.

ABOUT M. BOHLKE CORP.

Our Culture

We feel that dedicated people are the key to our success. Through the efforts of our team, M. Bohlke Corp. has become a world leader in the wood industry. Over 50 of our 200+ employees have spent 25+ years with us! Our office is located in Fairfield, OH, just north of Cincinnati.

Our History

Benefits Overview

- Health and dental insurance.
- \$15,000 life insurance policy to the age of 65.
- Matching retirement contributions equal to 50% of the first 4% that an employee contributes, or 2%.
- A Perfect Attendance Bonus for hourly employees.
- Nine paid holidays.

Environmental Responsibility

We have a strong commitment to the preservation and protection of the forests which supply our raw materials. We work with timberland owners to responsibly harvest trees in a selective manner.

Over the years, we have invested, developed and patented technology to produce the most out of veneer quality logs. From our knife grinder to our patented vacuum flitch beds, we have increased yields, allowing us to make the most out of our natural resource.
