Close-up grain 8/4 Iroko

If you're looking for a durable, attractive, and cost-effective alternative to Teak, Afrormosia and Iroko are two African hardwoods worth considering. Both offer excellent natural resistance to rot, insects, and moisture, making them ideal for exterior use, including decking, boatbuilding, and outdoor furniture.

Afrormosia features a straight, smooth grain with a golden-brown hue and is known for its stability and refined appearance. Iroko, often called "African Teak," has a coarser, interlocked grain with warm tones and a proven track record in demanding outdoor applications. Easy to work and reliable in harsh conditions, these species combine beauty with long-term performance.

4/4 Canarywood boules

Known for its vibrant color range of golden yellows, soft oranges, and rich red streaks, Canarywood brings a rainbow palette without the need for stains or color treatments. Its bold grain and natural contrast offer visual depth that finishes beautifully. Each of our boules has its own personality, ready to become your next standout piece or pop of color in a custom build.
