Live Edge Slabs

Bringing natural design to life.

Commercial, hospitality, and residential settings are prime examples of where you find the implementation of live edge wood coming to life. From dining tables, bar countertops and coffee tables to sleek floating shelves and conference tables that make a statement, the use of live edge is all around us.

To accompany our growing lumber inventory, we stock a variety of indigenous and imported slabs for individual sale. The majority of our slabs offer unique opportunities for bookmatching, due to the sequencing and consistency of having come from one log. Each slab is photographed and measured to ensure you have the ability to select the exact piece that fits best for your project.

FSC®-certified products are available upon request. We also offer slab surfacing for an additional cost. Our WoodWizz C: 6XC accommodates tops up to 16' long and 72" wide.

Let us help pick the perfect slab for your next project. Visit lumber.mbvener.com to browse our live edge slabs.

Square Edge • Premium Boules • Live Edge Slabs • Bases

Live Edge Slab Species

We specialize in fine quality lumber to complement our veneer. Much of our lumber is cut from veneer quality logs to achieve superior lumber grade for architectural millwork and yacht requirements. FSC®-certified products are available. If a desired species is not listed, please inquire.
